

Eye of the Storms

A typhoon is a windy tropical storm that happens near Japan. In 1281, a typhoon saved Japan by preventing a foreign army from invading.

Below is a list of types of storms. Think of a place in the world where each type of storm could happen and write it on the line. In most cases, there is more than one correct answer.

1. Typhoon
2. Cyclone
3. Hurricane
4. Monsoon
5. Tornado (twister)
6. Blizzard

WHERE IN THE WORLD DOES IT HAPPEN?

in the Pacific Ocean near Japan
